Tenure-Track Faculty Position  
Veterinary Clinical Pathology

The University of Calgary (UofC), Faculty of Veterinary Medicine (UCVM) is seeking a Veterinary Clinical Pathologist for a full-time tenure track faculty position at the level of Assistant Professor or a full-time Associate Professor with tenure.

The successful applicant will focus on undergraduate teaching and diagnostic service activities, with concurrent opportunity for scientific and/or educational research development. Clinical Pathology diagnostic service at UCVM is currently provided through a partnership with Antech Diagnostics. Teaching activity will involve didactic and laboratory instruction within our highly integrated first through third year DVM curriculum, and practicum rotations in the fourth year. There will also be future potential to assist with creating and delivering a clinical pathology residency-training program.

Required qualifications include a DVM, or equivalent degree, and board certification, or board eligibility, in clinical pathology (ACVP or ECVP). A graduate degree is considered an asset. Demonstrated teaching excellence is desirable. The appointment will be at the level of Assistant or Associate Professor with salary commensurate with experience. Must be licensed or eligible for licensure in the Province of Alberta (http://abvma.ca/). Appointment to the rank of Assistant Professor normally requires evidence of successful teaching ability or professional experience, with evidence of appropriate research or professional activity beyond that involved in the completion of academic or professional training. Appointment to the rank of Associate Professor requires evidence of teaching effectiveness, recognized research attainment or equivalent professional attainment, and a satisfactory record of service.

UCVM is the youngest veterinary medical faculty in Canada and is already well established amongst research-intensive North American veterinary colleges due to the quality of its research programs and the engagement of undergraduate and graduate students with research. There are approximately 70 faculty members, 130 staff, 125 DVM students, 110 graduate students, 25 post-doctoral fellows, and 15 advanced clinical trainees. The DVM program is an integrated core-elective program, with enhanced educational opportunities in defined areas, that combines discipline-based courses with extensive on- and off-campus experiential learning. UCVM uses a distributed veterinary learning community including public and private practice partners to deliver its fourth year practicum program. UCVM is a research-intensive faculty with its research space being closely located with the Cumming School of Medicine providing an outstanding research infrastructure and a unique environment for comparative medical and One Health research (http://vet.ucalgary.ca/research/research-groups). Descriptions of the Faculty, its programs, and its departments can be found at www.vet.ucalgary.ca . Applicants wishing more information are encouraged to e-mail vetdean@ucalgary.ca .

Located in Calgary, a vibrant, multicultural city of 1,200,000 near the Rocky Mountains, Banff National Park, and Lake Louise. The University of Calgary is a research-intensive, comprehensive university that supports innovation in education, research, and service to the community.

Review of applications will begin April 3, 2017 and continue until the position is filled. Interested individuals should submit a Curriculum Vitae; a statement of teaching and scholarly interests; and the names of three referees to:

Ms. Linda Butcher, HR Coordinator,  
Faculty of Veterinary Medicine  
3280 Hospital Drive N.W. Calgary, AB, Canada T2N 4Z6  
e-mail: lbutcher@ucalgary.ca

Those applicants wishing more information are encouraged to visit the website or e-mail vetdean@ucalgary.ca .

All qualified candidates are encouraged to apply; however Canadians and permanent residents will be given priority. The University of Calgary respects, appreciates, and encourages diversity.
