Hey there OVC students!

I know the most important factors in where you decide to work for the summer are the location, mentorship, experience, and money offered and we have it all!

We are a very busy mixed animal practice in Valleyview, Alberta. Spring and summer represent a great time to see the huge variety of activities at a mixed animal practice from foaling, calving and neonatal care, to breeding soundness examinations, to lameness work-ups, to all the elective procedures such as castrating everything from Clydesdales to Chihuahuas!

I've had the pleasure of experiencing a wide variety of poor to amazing mentorship styles and so realize the value and importance of a good mentorship relationship. I've had a summer student virtually every summer of my career and hope to keep that going! I strongly believe in hands on learning and letting my students do whatever they are comfortable with (and even encouraging stepping out of your comfort zone while you have a safety net).

If you are interested in an amazing opportunity to gain some great mixed animal practice experience send me a resume (including references) by March 20, 2020! I look forward to hearing from you!

Dr. JM Pozniak  
WCVM Class of 2010  
Greenview Veterinary Services  
Valleyview, Ab

P.S. There is definitely opportunity for long term employment for the right candidate after you finish vet school!
