3rd Year DVM Summer Student Opportunity

Supervisors – Drs. Cate Dewey, Interim Director, One Health Institute, Dr. Jane Parmley and Katie Clow, Department of Population Medicine.

Outline of Project:

The University of Guelph is in the process of launching an exciting new initiative – the One Health Agenda. One of the primary goals of this Agenda is to prepare effective transdisciplinary graduates who are qualified to work in and ultimately lead teams to solve problems at the intersection of animal, human, and environmental health. In order to achieve this goal, several new concurrent DVM/graduate programs will be developed, including DVM/MPH and DVM/MSc. These will enable DVM students to earn a masters degree by investing only one year after DVM graduation (4+1).

Job Description:

We are seeking one or two DVM students who have completed phase 3 who would like to work 4 weeks or longer (either before or after your Externship Program) with a Team of One Health faculty members to assist with One Health curriculum planning and development at the DVM and graduate level. Specifically, the role will be to identify competencies (knowledge and skills) from the DVM program that overlaps with those from the graduate programs.

This position will be one of 2-3 other DVM/Undergraduate students working as a team for the One Health Agenda.

Strong organizational and time management skills are an asset for this position, as well as an ability to work independently and with a team. Familiarity with and interest in One Health is also of value.

Interested Students should apply with a resume, cover letter and a copy of your transcripts to Sally Maclachlan, email: smaclach@uoguelph.ca by Monday, March 11, 2019.
