Would you like to leave the snow and cold behind for sun and palm trees? Does earning 20%+ on every dollar made to go towards repaying student loans sound amazing?!

Freeport Veterinary Medical Center is a predominantly small animal practice (90SA/10LA) located along the Texas Gulf Coast in Freeport, Texas. We are 45 minutes south of Houston (we were high and dry during Harvey!), are just outside of Lake Jackson, and are close to the beach community of Surfside. FVMC is a 3 full time equivalent doctor practice looking to add a qualified 4th veterinarian as we grow and acquire a second practice.

FVMC is owned by a 2012 TAMU graduate and a 2013 OVC graduate. Our staff is young, energetic, fun loving, and knowledgeable. Currently, we mostly see small animal patients but also have a growing exotics, emergency and large animal mobile service clientele. The practice features a modern surgical suite, radiology and treatment area. We have also recently renovated the client waiting area/reception and exam rooms.

We are looking for an associate to fill our small animal medicine +/- exotics needs, but large animal medicine interest is a bonus if the applicant wants to be a mixed animal practitioner.

Our facility has full point of care diagnostics, including CBC & Blood Chemistry Analyser, Vetgard+ Wireless Monitoring Equipment (including ECG, SPO2, respiration, temperature, TCO2, NIPB), Digital Radiography (including dental), new Sonoscape Ultrasound and more! We utilize cornerstone software and keep complete digital records. Our services include; routine preventative medicine and surgical care, internal medicine, dentistry, soft tissue surgery, orthopedic surgery, reproductive services, exotic animal medicine and surgery, boarding, grooming, and emergency services. We also work closely with the local SPCA and a large, well managed local rescue organization. This area is growing rapidly each year, and we see many new clients each month. We are seeking a new graduate or experienced practitioner that is personable, has a good work ethic, enjoys hands on learning, can communicate well with clients and staff, and has a positive attitude that will help him/her build confidence while learning. Current veterinarians enjoy mentoring and will be glad to share our knowledge with new graduates so that you can further develop your medical skills and specific
interests. Competitive Salary, Emergency Income, year end bonus, 2K in CE allowance, 2K in relocation allowance are just a few perks! Our doctors have one 3-day weekend monthly and a half day off weekly. Please feel free to contact us if you are interested and would like to come down for a visit at 979-253-0550 or email: fvmc2015@gmail.com
