A full-time summer student position is available for a DVM student to assist with a systematic review of treatments for clinical mastitis in dairy cattle. The student will be required to work with a PhD student to screen abstracts to select studies that evaluated mastitis treatments, acquire copies of the publications that are relevant, and extract information from the publications using a structured template. The position requires attention to detail and the ability to work independently. The position is full time (35 hours per week) starting May 1 until Aug. 15. Interested students should submit a letter of interest, CV, unofficial transcript, and the names of 2 references to Dr. Jan Sargeant, Population Medicine, by Feb 26 2018.
