A full-time summer student position is available for a DVM student to conduct a literature review of zoonotic disease prevalence in Arctic wildlife and to assist with a scoping review of public health issues related to dog ownership. The literature review component will require the student to review studies that estimate prevalence of zoonotic diseases in marine mammals (seals, whale, walrus), bivalves, geese, polar bears, caribou, and muskox. For the scoping study, the student will be required to work with a PhD student to screen abstracts to select studies that are relevant to public health and dogs, acquire copies of the publications that are relevant, and extract information from the publications using a structured template. Approximately ½ of the time will be spend on each project. The position requires attention to detail and the ability to work independently. The position is full time (35 hours per week) starting May 1 until Aug. 15 and pays $15 per hour. Interested students should submit of letter of interest, CV, unofficial transcript, and the names of 2 references to Dr. Jan Sargeant, Population Medicine, by Feb 26 2018.
