

Histology Equipment Sign Up

From the Office 365 team:

The way we book is create a new event on the calendar by selecting a time section on the calendar and then click "More Details" in the pop up window. Each equipment has an email address, so you would book the equipment by typing in the email address in the field "Add people" on the right side of the window. Once added, the equipment should show up as an attendee in the "Attendees" list under your name. That's how you book on the equipment's calendar.
