Re: Freezer storage room 2135/2137 (-20C)

There are 4 -20 chest freezers that need to be cleaned out. If you may have any items in these freezers please note the following:
-freezers #1-3 have been in the dept for some time now and have a mixture of sample types
-freezer #4 was recently moved from old PM to our freezer room and should contain ONLY cadaver samples

*if you need to keep the item(s) fill out the inventory on top of the freezer you are using for storage
*if continuing to use freezer storage make sure to have **ALL ITEMS WELL LABELLED**
*if there are items that are no longer needed please remove them from the freezer and discard appropriately (if clarification is needed for this contact Michelle Beaudoin-Kimble)

**At the end of January 2020 any items in these freezers that are not labelled, or have not been listed on the inventories, will be discarded**
