CFIA Summer Student Position:

This position will support epidemiological and trace activities for a large scale response where approximately 1600 dairy cattle were exported from the USA into a large Ontario dairy operation without the required Brucellosis and TB testing.

Maryland Based Cattle Exporters Indicted For Fraud | USAO-MDPA | Department of Justice

The work will be primarily based on the analysis of data collected from the importer to allow for tracing and subsequent testing of the implicated animals.

An Incident Command Structure has been set up to manage this response and we expect the activities to expand significantly as information is gathered and organized.

The work can be conducted virtually

Interest or experience with Epidemiology would be considered an asset
Previous CFIA employment or experience would be considered an asset
Locations considered assets would be Guelph or London

Start date: May 3, 2021
End date: August 27, 2021
Salary: 24$/hr
