

Where ideas work

**BC Ministry of Agriculture
Abbotsford**

Veterinary Specialist (Fish Pathologist)
Salary \$81,236.34 - \$101,465.20 annually

An excellent opportunity for a specialized and dedicated professional.

The Plant and Animal Health Branch supports the sustainability of animal and plant agriculture, while serving to protect the well-being of the people of the province of British Columbia through surveillance, regulatory compliance, risk assessment, and the development of strategies to address identified risks.

The Animal Health Centre is the AAVLD accredited provincial veterinary diagnostic laboratory that provides world class diagnostic services to protect the health of all animals in B.C. in support of disease prevention, control and eradication. The Centre protects human health with the timely and accurate diagnosis of zoonotic diseases that transmit from animals to humans, in both the public health and the food safety sectors.

A Fish Pathologist is a highly effective communicator and collaborator, able to provide comprehensive reports and work successfully with industry, stakeholders and Ministry executives. Analytical, innovative and results oriented, you work with other fish pathologists to initiate special investigations when required and represent the Ministry on inter-jurisdictional working groups and committees. An expert in your field, you have the ability to provide effective diagnostic services and the vision to address future industry and ecosystem needs. If you are a skilled veterinary pathologist seeking a new challenge and a position where you can make a difference, we look forward to your application.

This is an excellent opportunity for a veterinary pathologist interested in fish to see a large and diverse case load and to work with a group of highly skilled and experienced veterinarians and scientists in an AAVLD (American Association of Veterinary Laboratory Diagnosticicians) accredited laboratory.

Qualifications for this role include:

- Doctor of Veterinary Medicine, or an equivalent degree, from a university of recognized standing.
- Post graduate training in anatomic veterinary pathology to the masters (e.g. MSc/MVSc) or doctoral (e.g. DVSc/PhD) level OR
- Certification by the American or European College of Veterinary Pathologists (A.C.V.P. or E.C.V.P.).
- Combination of post graduate training and board certification as outlined above is preferred.
- Experience in diagnostic fish pathology.
- Must be licensed to practice by the College of Veterinarians in British Columbia (CVBC) or an equivalent Veterinary Licensing body in North America.
